

## STR Authentication Report For Cell Line

1. Cell Name: BT-B

2. Test Method: DNA was extracted using the genome extraction kit (Axygen), amplified using a 21- STR amplification protocol, the STR loci and gender gene Amelogenin were detected on the ABI 3730XL Genetic Analyzer.

3. Sample gene genotype analysis result:

| Genotype analysis results of STR and Amelogenin loci in cells |                             |         |         |                                |         |         |
|---------------------------------------------------------------|-----------------------------|---------|---------|--------------------------------|---------|---------|
| STR Loci                                                      | STR profile for Sample cell |         |         | STR profile for Cell Bank cell |         |         |
|                                                               | Cell name: STR25031413      |         |         | Cell name: BT-B                |         |         |

4. Conclusion: The STR results of **BT-B** cells are consistent with the genotypes of **BT-B** cell lines in **DSMZ** database, the cell ID corresponded to **ACC-227** , and the STR results **completely matched**. In the test, **No multi allele was found** in this cell line.
